

Fashion for your profession

He stands strong – so do his clothes

# CANVAS 320

GB

A man with glasses and large black headphones is operating a large industrial machine. He is wearing a grey work shirt. The machine is blue and yellow. The background is a blurred industrial setting.

CANVAS 320

# ROBUST INSERTS

Whether in industry or on a construction site – wherever you work, you need clothing that stands up to the test. Work that requires you to use your elbows or slide on your knees necessitates the very best clothing.

Hard workers are kept safe with the PLANAM Canvas 320 workwear range. The special feature of this high-quality brand collection is its durability. The areas put under particular stress are tear and abrasion-resistant thanks to the Teflon®-refined high-performance fabric, Cordura®. Canvas 320 is the perfect indoor and outdoor collection: breathable in the heat, and dirt and water-repellent in the rain. The reflective piping creates a dynamic appearance.

PLANAM also has the solution for harsh winter days: The Canvas Winter range offers all the advantages of the Canvas 320 collection and, thanks to the PU-coated polyester outer material and warm polyester padding, keeps you warm when working in the colder months of the year.

## Waisted Jacket

### Storage space with strength

It's great when workwear has pockets that can withstand stress. The Canvas 320 Waisted Jacket provides storage space for even heavy tools with its tear-resistant pouch pockets made of Cordura®.

#### Extras

- 2 pouch pockets made of Cordura®
- reflective strips on sleeve inserts and on pocket flaps
- 1 chest pocket on the left with flap and press studs
- 1 chest pocket on the right with a patch mobile phone pocket
- 1 sleeve pocket on the left with double pen holder
- elastic in the waistband
- covered press stud facing for front closure
- cuffs can be adjusted using press studs
- hanging loop in the collar

#### Clothing sizes

##### Normal sizes

42 – 44 – 46 – 48 – 50 – 52 – 54 – 56 – 58 – 60 – 62 – 64

##### Slim sizes

90 – 94 – 98 – 102 – 106 – 110

##### Plus sizes

24 – 25 – 26 – 27 – 28 – 29

#### Certificates and standards

Tools are stored safely in the **chest pocket with flap and press studs**

**Tear and abrasion-resistant** thanks to Cordura®

You can quickly access pens, your mobile phone, etc. in the **arm pocket with double pen holder**

# STANDARDS & CERTIFICATION

## DIN EN 14404 Knee protection for workers kneeling down

Working in a kneeling position creates constant pressure on the knee. Knee protection is designed to distribute the forces produced evenly across it. In addition to this, it is designed to prevent injuries or damage caused by hard surfaces, small stones or similar objects lying on the ground. Knee protection is subdivided into 4 types:

Type 1: Knee protection that is separate from clothing and fastened to the leg.

Type 2: Pads inserted into pockets on trouser legs or permanently attached to the trousers.

Type 3: Equipment that is not attached to the body.

Type 4: Knee protection forming part of a unit with additional functions.

In addition to this, there are two performance classifications:

Level 1: The knee protection is suitable for even ground where there is no risk of objects over 1 cm in height.

Level 2: The knee protection is for use in challenging conditions, such as for example when kneeling on stones in mines or quarries.

The PLANAM knee pad product no. 9901027 is certified as Type 2, Level 1 knee protection. This certification only applies in conjunction with PLANAM trousers, dungarees or overalls and cannot be transferred to other products.

The OEKO-TEX® Standard 100 is an independent testing and certification system for raw, intermediate and end products for textiles from all stages of processing. Examples of certifiable articles are raw and dyed/refined yarns, raw and dyed/refined woven and knitted fabrics, ready-made articles (garments of all types, home textiles, bedding, terry towelling, toys made of textiles and many others).

### Criteria

Tests for harmful substances cover:

- substances banned by law
- substances regulated by law
- chemicals that are known to be potentially harmful to health (but are not yet regulated by law)
- healthcare parameters

In their entirety, the requirements go well beyond existing national legislation.

### Why OEKO-TEX®?

The OEKO-TEX® Standard 100 was developed in the early 1990s as a response to the need of consumers and the general public for textiles that do not pose a risk to health. Negative headlines such as "Poisons in textiles" were widespread at the time, labelling all chemicals used in the production of textiles as negative and harmful to health.

Fashionable colours, easy care, long life and many other functional properties are demanded of textiles today and are, to some extent, and depending on their intended use (e.g. for professional and protective clothing), quite indispensable.

## UV protective clothing with integrated sun protection

The largest organ of the human body is the skin, and it is exposed to great danger in summer. UV rays from the sun can increase the risk of skin cancer. Standard textiles are radiolucent, providing insufficient protection.

PLANAM's UV-protective clothing gives guaranteed certified safety.

Awarded UV protection certificates "PROTECT 80" and "PROTECT 40", this range guarantees maximum prevention. Just like for sunscreens, the figure indicates the protection factor for safely spending longer in the sun. Our PLANAM models allow the wearer to remain in the sun 80 and 40 times longer than those without protection. With their integrated sun protection factor, the finished garments provide the skin with optimum protection. Those with sensitive skin can stay in the sun longer without having to cover themselves in sunscreen. It is important to know the individual skin type in order to determine the individual's protection time (length of possible exposure to the sun without risk of skin damage). The stated UV protection factor (e.g. Protect 80) gives the factor by which the individual's protection time can be extended just by wearing these textiles.

# SERVICE

## The first impression is the key

The right work clothing is always a calling for your company and is also used as free advertising space with your logo. We bring your message to a wider audience – with the PLANAM finishing service.

### Infinite variety

There are thousands of variations and options to personalise the PLANAM products and create an individual design. Here we are showing you a small selection of what is possible, in order to inspire you and give you ideas. Please contact us for expert advice to find out which type of finishing fits most optimally with our products. You explain your requirements and we will make them happen in as short time as possible.

### Small order or large production runs

It doesn't matter whether it is a small trade business with 5 employees that needs to be equipped with CI Clothing or a large industrial company with several hundred employees. We can create up to 1000 emblems a day for you at the Herzebrock-Clarholz site.

### Finishing of Personal Protective Equipment (PPE)

It is particularly important in relation to the finishing of Personal Protective Equipment (PPE) that the type of finish added is specifically suited to the PPE type examination certificate and is recertified accordingly. Here to, PLANAM offers a multitude of certified options for attaching your company logo on the PPE.

For any modification to the PPE which is not recertified, the type-examination certificate will no longer be valid and the complete protection of the wearer can no longer be guaranteed.

Available in any colour and with vast design options for a size of max. 390 x 390 mm.

Special embroidery thread made from high-quality polyester guarantees long-term durability.
